

WHIRINAKI TRACK & CENTRAL HUT, THE CAVE and MINGINUI

260 Series Map: Whirinaki, V18

Topo50 Map: BG38 Wairapukao

How to get to START

- Exit Taupo on **SH5** for Napier
- Straight on through Rangitaiki
- 40 minutes turn left on to **Pohokurua Road**
- Cross bridge, left at **T-junction** on rough forest road
- About 1 hour pass through mature coniferous forest
- 1:05min go **right at T-junction**. This is signed left for SH5 on the way out
- 1:07min right at next T-junction passing Circuit Road
- Right on to **Pine Milling Road**
- Left on to **Plateau Road** – straight on
- Car park with toilet (**WHIR01**)

Access to the starting point on Plateau Road is not too easy and use of the map or, better, someone who knows the way acting as a guide is a good idea. Access via Link Road etc requires a permit and can be problematic so the above route is recommended.

The start of the route back to Taupo is also shown opposite with the forest road followed to Minginui where SH38 is picked up for Murapara, as shown. Stay on SH38 till SH5 (Taupo Rotorua) is met then followed.

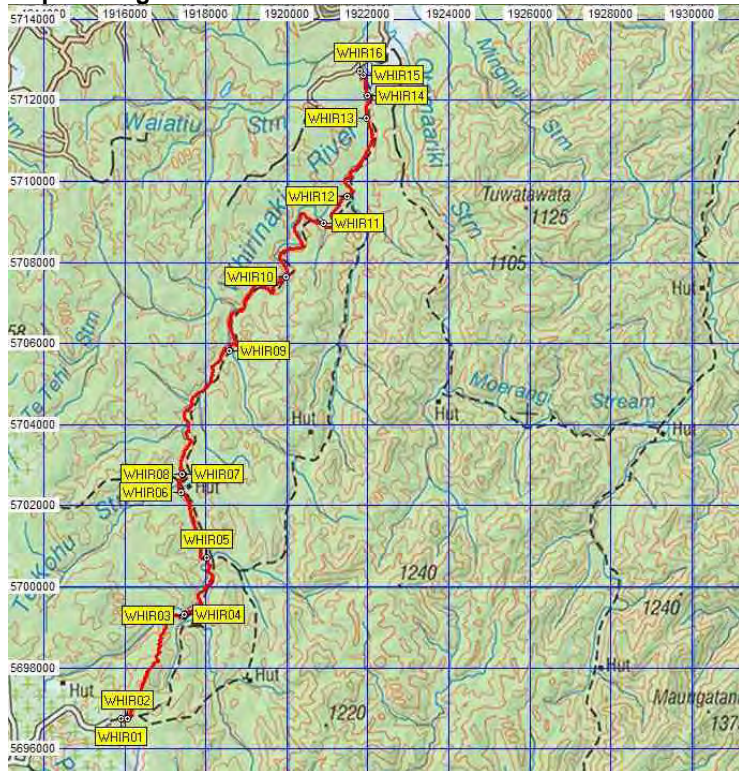

Rough description: Several variations are possible but this note basically covers walking from the car park on Plateau Road in the forest area north of the Napier Road (SH5) to Minginui via the Central Whirinaki Hut and the "cave".

Variations that can be done are:

- Plateau Road to the Central Hut and return (21km)
- As above but exit via Upper Whirinaki Hut
- Plateau Road through to Minginui (24km)

If tackling the whole "through" walk it is slightly less demanding to go from Plateau Road to Minginui rather than the other way round as there is an overall altitude loss of just on 550 metres. This altitude gain / loss is at the Plateau Road end so it means that, if coming from Minginui, the last part is a huge grunt uphill. The short detour to the cave is well worth doing as the cave is quite large and worth seeing.

Detail: Assuming that you have actually found your way to the car park (**WHIR01** 950masl) after about 1 hour 30 minutes drive from Taupo exit downhill through the archway where you will find a notice board and map of the area. In 15 minutes you reach a Y-fork with a notice (**WHIR02** 926masl) to the Upper Whirinaki Hut – the main path for Central Hut goes left. Another Y-fork (**WHIR03** 629masl) is found after 1:10 walking and this time the path to the right goes to the "Cave". It only takes a few minutes to reach the cave so this diversion is worthwhile though it is not too obvious where to go. When you come to a slightly incised stream line turn and go upstream for the cave. Immediately after the side path to the cave there is a swing bridge and another path (**WHIR04** 631masl) goes off right to the Upper Hut whilst you continue to the left for the Central Hut. In a walk time of about 2 hours cross another bridge (**WHIR05** 620masl) with signs for the Mangamate and Upper Whirinaki Huts to the right and the Central Hut to the left. The latter (**WHIR06** 599masl) is reached in 2:30 minutes. If hungry it is a good idea to take an early lunch here at the hut if you are going straight through. This is a good place to overnight if you have set-off later in the day.

Start

Cave mouth

Looking out of the cave

Central Hut

The sign-boards give good estimates of the walking times and distance back to Plateau Road but overstate the distance to River Road by 2 km. Remember that the walk out southwards from the hut does take longer than the walk in – a huge ascent up to Plateau Road. Continuing on northwards from the Central Hut there is a tunnel (**WHIR07** and **08**) after about 20 minutes then the Kakanui Stream (**WHIR9** 510masl) is met. The walk seems to go on forever in forest with little to see apart from trees and vegetation – though there are some rather fine trees to be seen. Little bird life was seen though some was heard and many DOC traps can be seen so a clean-up is in progress.

Distance board at Central Hut

An open area, Verns Clearing or Camp (**WHIR10** 476masl), is reached in total time of 4:30 minutes to 5 hours. This is a good place for a late lunch if going straight through as lately a huge new shelter with a sink, benches, a work top and even a woodburner has been erected. There is ample camping space around here or, if conditions were really bad, it would be possible to sleep in the shelter with some comfort..

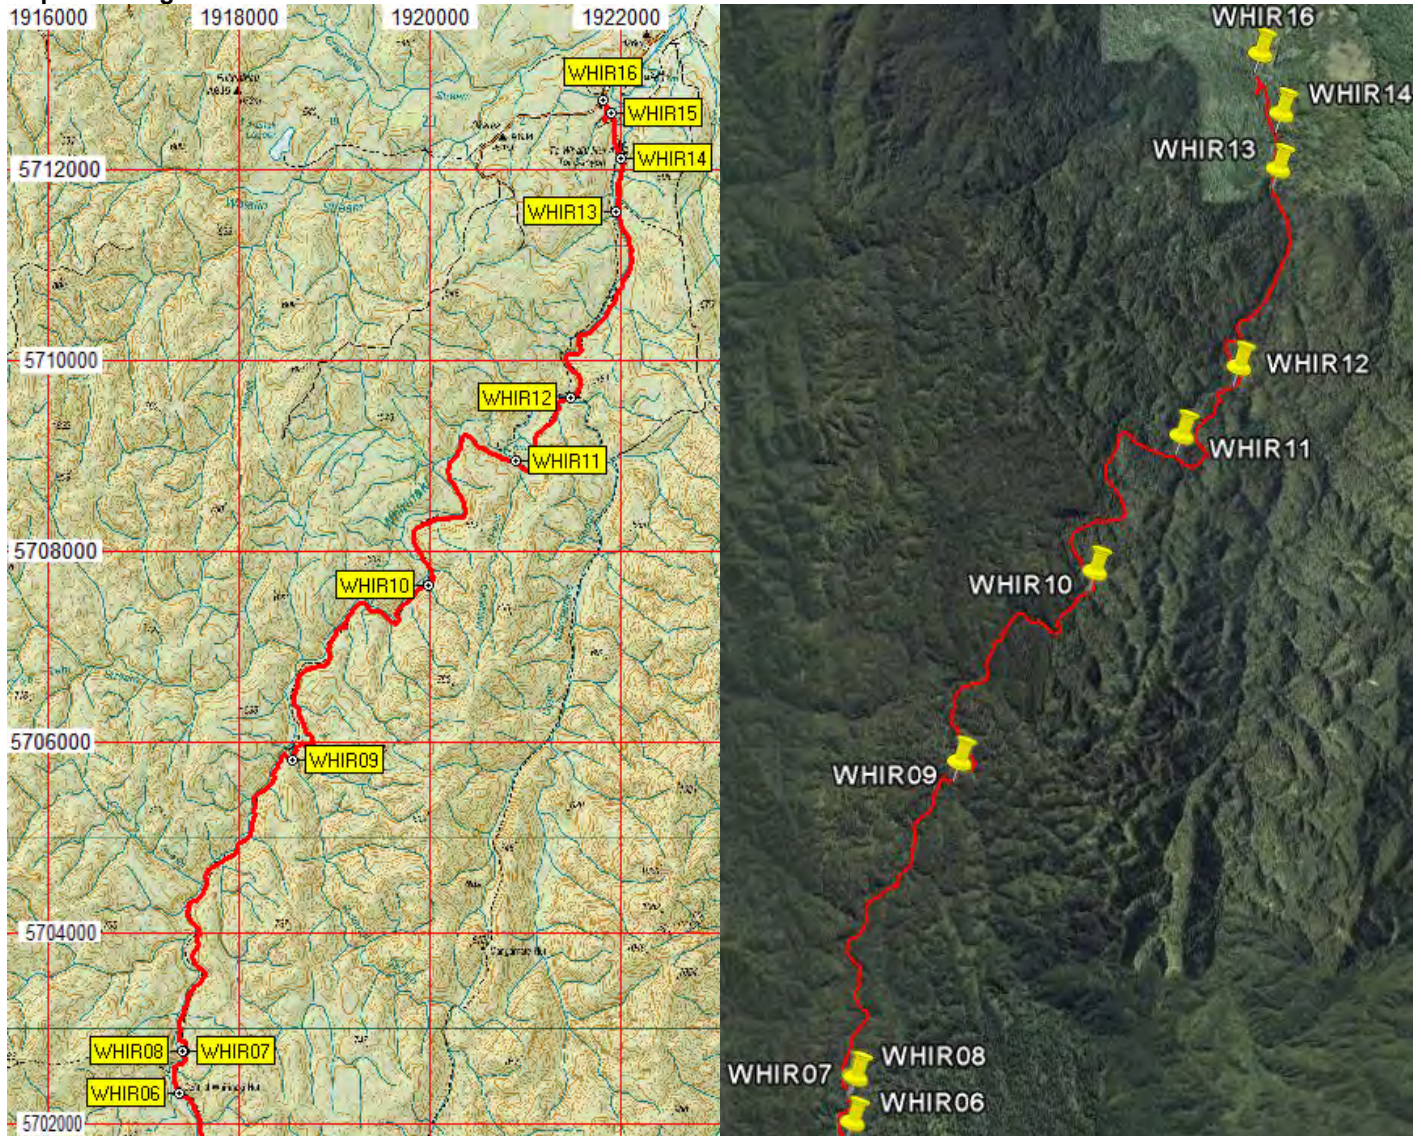

An hour further on there is a T-junction(**WHIR11** 442masl) with the Waterfall and Falls Loop track going off left; go right towards River Road which is noted as being 2 hours walk away. At the next T-junction (**WHIR12** 419masl) go left over the bridge whilst going straight goes to the Mangamate hut. Thirty minutes further on there is yet another T-junction (**WHIR13** 399masl) where you go left towards Minginui Road but right if heading for Moerangi Helicopter pad and peak.

The tunnel

There is a large, new bridge over Te Whaiti Nui A Toi Canyon (**WHIR14** 389masl) at around 7 hours where the route goes straight ahead whilst the Falls Loop track joins from the left. Indications of the end of the track are noticed as large explanatory notices for the day-trippers about the flora and fauna. The track log book (**WHIR15** 395masl) is then found on the left and the car park on River Road at the end of the Whirinaki Track (**WHIR16** 414masl) is reached in about 6:45 minutes to 7:15minutes.
